SUMMARY

Detail-oriented and creative Front-End Engineer with a strong passion for Open Source collaboration. Demonstrated success in developing and implementing responsive web applications. Seeking to leverage my skills and expertise to contribute to a dynamic tech company.

EXPERIENCE

Front End Engineer @ Bonshare: **(Mar 2023- August 2023)**

- Spearheaded the development and testing of fully responsive web applications using ReactJS and various front-end libraries.
- Collaborated closely with fellow developers to meticulously craft pixel-perfect websites, consistently prioritizing an exceptional user experience.

Open Source:

- **HacktoberFest 2022**- Made significant contributions to Open Source Front-End Projects, including HacktoberFest 2022, where I successfully had four Pull Requests merged.
- **React Play**- I played a role in the React Play open-source project, making substantial contributions that spanned both code and community engagement.

PROJECTS

Crappo Web App- Developed a cryptocurrency website using ReactJS and incorporated the animation library AOS (Animation on Scroll).
